Maths Week 2022

The Maths Department organised Maths week which took place last week. It was a chance for students to take part in a range of activities and see how Maths links to everything we do. All the students took part in the same activities but they were differentiated to support all abilities.

The activities included:

- Throw and Measure- Measuring and comparing distances of a boot throw
- Music and Maths- Rating Eurovision songs and comparing results
- Problem Solving- Scavenger hunt for clues to decode a message
- Shoot out Stars and Statistics- Penalty shoot out with many variants.
- Sporty Maths- Throwing challenge, tallying their total score.

The students enjoyed having lessons out of the classroom and trying new activities with different teachers.
